SOUTH CHINA UNIVERSITY OF TECHNOLOGY

Exceptional young and talented researchers sought

Young researchers with strong records are encouraged to join South China University of Technology.

South China University of Technology (SCUT) was established in 1952. It has been selected for Project 211 and Project 985. SCUT well knows the importance of recruiting and nurturing talented scholars to a university striving to become one of the best in its class in China and highly respected in the academic world. Thus, people with strong teaching and research records are invited to work at SCUT and help it achieve this goal.

Recruitment Program of Global Youth Experts (a national programme)

Applicants are expected to:
- have research experience in natural sciences or engineering;
- be under 40 years of age;
- have a doctorate from an accredited overseas university, with at least three years of experience working overseas in research or education; or have received a doctorate from a recognized Chinese university, with at least three years of experience working overseas in research or education; or be experts at top overseas universities, research institutes or companies;
- be academic leaders or potential leaders in their area of expertise.

(Recent PhD graduates with strong research records and scientists with distinguished academic achievements may be considered even if they do not meet the above requirements regarding age and working experience.)

Applications will be assessed by the programme director and approved by the university. Applicants should then be available to work full time.

Salary and benefits include:
- Research funding: 1,500,000–3,000,000 RMB from the national programme and 500,000 RMB from Guangdong province.
- Housing benefit: 500,000 RMB (after tax) from the national programme and 250,000 RMB (after tax) from Guangdong province.

In addition, SCUT will provide:
- Research funding: 1,500,000 RMB.
- Annual salary: at least 400,000 RMB (before tax).
- Housing benefit: 800,000 RMB home acquisition allowance (before tax) or on-campus housing and 50,000 RMB relocation expenses (monthly rent to be paid).

To assist qualified researchers to adapt to the academic environment of SCUT, support is provided for matters such as applying for temporary or permanent residency, visas, health insurance and schooling for children.

Extraordinary Talent Recruitment Project (a university programme)

Applicants are expected to:
- Be under 50 years of age and be an associate professor or professor at a top overseas university or research or technical experts at a top overseas institute or company;
- Be under 40 years of age and have worked at least three years overseas in research or education and have a strong academic background;
- Be available to work full time.
